How to embed a short instructor-made video on eLearning

There are several ways for inserting or embedding into eLearning short videos made by the instructor. Embedding a video from your Google Drive is a simple and easy way to present a video to your students.

Steps:

1. On your Google Drive
   1.1. Create a folder on you Google Drive.

   ![Folder Creation](image)

   1.2. Set the permissions for the folder to “Anyone who has the link can view”.

   ![Permission Setting](image)

   1.3. Upload your video to the folder.

   1.4. Double click on the video to open up a preview.
1.5. Click on the pop-up button on the top right side of the screen.

1.6. Click on the More Actions button.

1.7. Select Embed item...

1.8. Copy embed code.

2. In your eLearning course shell

2.1. Open the content page on eLearning.

2.2. Click on the Edit HTML button.

2.3. Click on the Insert Stuff button.
2.4. Select **Enter Embed Code**.

2.5. Paste the embed code.

2.6. Click on **Next**.

2.7. You may be prompted to allow the video to show up. If so, then click on **Allow**.
2.8. Click on Insert.

2.9. Optionally, you can center the video on the page by clicking on the video and selecting Align Center from the dropdown menu to right of the bullet points button.

2.10. Click on Update.
