

# Hangouts Meet

*Google Hangouts Meet is video-conferencing and telepresence software. Users in Hangouts Meet can simply send a link to anyone with a Gmail account to invite that person to join them in a meeting. Hangouts meeting invites created using Google Calendar will now default to Meet. Meet is only available using Google Chrome. You may access the "Hangouts Meet" app via [MyUWF](#).*

For further information regarding Hangouts Meet, please visit the [Getting Started with Hangouts Meet](#).

## What is "Hangouts Meet"?

Google Hangouts Meet allows you to hold:

- impromptu meetings on the go
- international virtual training classes
- remote interviews
- and more

Hangouts Meet allows a meeting for up to 25 people at a time (unlimited meeting duration).

Visit the [Meet vs. classic Hangouts feature comparison](#) for a list of changes and supported platforms.

Classic Hangouts can still be used for chat functions, but Meet will be used for video calls.

## System Requirements

Meet supports the current version and two previous major releases of the following operating systems:

- MacOS
- Windows
- ChromeOS
- Ubuntu and other debian-based linux distributions.

## Web browser support

Currently, **Google Chrome** is the only supported internet browser (version must be up-to-date).

## Hardware Requirements

- Webcam and Microphone
- Quad Core processor or greater for streaming HD Video

## How to create or join a video meeting

Please refer to [Google's Hangouts Meet Guide](#) for instructions to start or join a video meeting using your UWF G Suite account.

## Mobile Device Support
