

6. Submit Peer Reviews

A peer review assignment enables students to provide feedback on another student's assignment submission. Peer reviews are a tool that allows communication between students and can help students master the concepts of a course and learn from each other. Peer reviews can be assignment to show student names or display anonymously.

Instructors have the option of marking an assignment for peer review. You will be required to submit your assignment before reviewing your peers assignments.

To Submit a Peer Review:

- a. Click the **Assignments** link or within a course module.
- b. Locate and click the **Assignment title**.
- c. Click the **name of the assigned peer** whose work you will be reviewing.
- d. View the peer review. You must submit at least one comment to complete the peer review. If you want to submit annotations, click on the **preview icon**.
- e. Remember, when completing a peer review, students cannot see the teacher's comments or their peer's comments on the submission.
