

ArgoAir Setup Instructions: Android

Connecting to ArgoAir

Step 1

From the Home Screen, navigate to the **Settings** icon.

Step 2

In the **Settings** menu, select the **Wi-Fi** option.

Step 3

In the **Wi-Fi** menu, make sure the switch next to **Wi-Fi** is turned on.

Step 4

Under Wi-Fi networks, select **uwf-argo-air**.

On this page

Step 5

Once **uwf-argo-air** is selected, a menu should be displayed. The proper configuration for each field is as follows:

- The **EAP method** field should be set to **PEAP**.
- The **Phase 2 authentication** field should be set to **MSCHAPV2**.
- The **CA certificate** field should be set to **Do not validate** or **(unspecified)**.
 - For Android 11 and 12 users, your device may only allow the option **Use system certificates** and will then prompt you to enter a domain.
 - The **Domain** field should be set as **uwf.edu**.

PEAP

Phase 2 authentication

MSCHAPV2

CA certificate

Use system certificates

Online Certificate Status

Do not validate

Domain

uwf.edu

Must specify a domain.

Identity

Anonymous identity

Cancel Save

- The **Identity** field should be set as **your ArgoNet username**.
- The **Anonymous identity** field should remain blank.
- The **Password** field will be **your ArgoNet password**.

Step 6

Select the **Connect** option in the lower right-hand corner of the menu. The device will now connect to ArgoAir.

Forgetting the Network

When users change their passwords, they'll need to forget the network, to re-connect to ArgoAir.

Step 1

From the Home Screen, navigate to the **Settings** icon.

Step 2

In the **Settings** menu, select the **Wi-Fi** option.

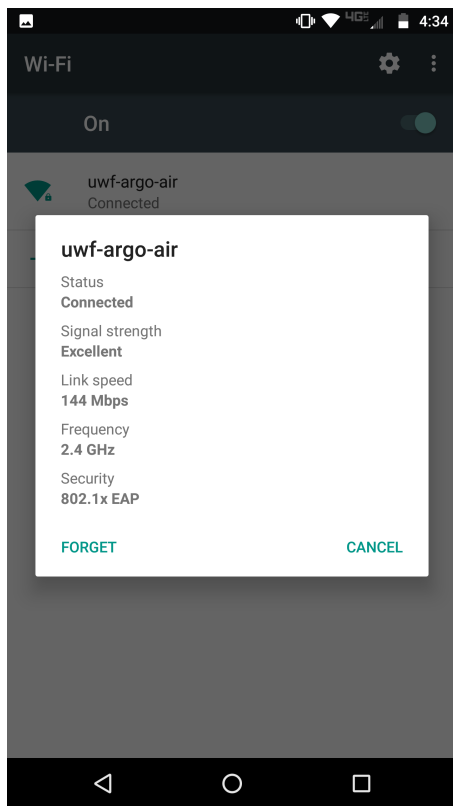

Step 3

Under Wi-Fi networks, select **MORE SETTINGS**.

Step 4

Click uwf-argo-air, then click **FORGET**.
